

Housing affordability improves in 2026Q1, extending two years of progress

By Kyle Dahms & Evelyne Gosselin

Highlights:

- Canadian housing affordability posted a ninth consecutive improvement in Q1'26. This continues the longest streak of improving affordability ever recorded in the country. The mortgage payment on a representative home as a percentage of income (MPPI) fell 0.5 percentage points. Seasonally adjusted home prices fell 0.3% in Q1'26 from Q4'25; the benchmark mortgage rate (5-year term) increased 1 basis points, while median household income rose 0.7%.
- Affordability improved in half of the ten markets in Q1. On a sliding scale of markets from best progression to least: Hamilton, Vancouver, Victoria, Toronto, Ottawa-Gatineau. Calgary was unchanged while Edmonton, Winnipeg, Montreal and Quebec deteriorated. Countrywide, affordability enhanced by 0.7 pp in the condo portion and 0.5 pp in the non-condo segment. See detailed statistics on pages 2 & 3.

Housing affordability improved again in the first quarter of 2026, marking a ninth consecutive quarterly gain, the longest streak on record. The mortgage payment as a percentage of income fell to 52.3%, its lowest level in four years (see top chart). Even with this improvement, affordability remains stretched, our indicator sitting well above its long-term average of 40.6% since 2000. The latest improvement was helped by a modest decline in national home prices, the third decrease in four quarters. Once again, regional trends varied meaningfully. Hamilton, Vancouver, Victoria and Toronto posted the largest improvement in affordability mostly due to largest home price declines among urban centers. In contrast, affordability worsened in Montreal and Québec City, where home price growth more than offset the impact of higher incomes and stable financing costs.

Interest rates have been a key factor in improving affordability since Q4 2023, falling seven times on a quarterly basis. However, this was not a factor in the last quarter, as rates remained essentially unchanged. The situation could even reverse in Q2 as mortgage rates have resumed their upward trend in the wake of the war in Iran, driven by expectations of tighter monetary policy. This does not necessarily mean that affordability will deteriorate in Q2, however, as home prices fell nationwide in April due to declines in 6 out of 11 cities, including the country's three largest cities ([link](#)). There is no doubt that the population contraction in the three largest urban centers represents a headwind for activity and real estate valuations in 2026 (see bottom chart).

Meanwhile, incomes continued to grow at a healthy pace in Q1, accounting for most of the improvement in affordability during that quarter. On a quarter-over-quarter basis, wage growth outpaced house price growth. As a result, the house price-to-income ratio is at its lowest level since the first quarter of 2021 (see top chart). We expect this metric will continue to improve in 2026.

Methodology

The National Bank Housing Affordability Report measures housing affordability in 10 major census metropolitan areas (CMAs) and summarizes the results in a weighted-average composite of the 10 CMAs. We track the **condo market**, **other dwellings** (single detached, semi-detached) and the **market as a whole**.

We measure two hurdles for the purchase of a home. First, a household must save the **down-payment** amount. We measure this requirement as the number of months a median-income household will require to save for the minimum cash down payment (CMHC insured mortgage) of the representative home at a savings rate of 10% of its pre-tax income. We evaluate the representative home using the Teranet–National Bank House Price Index for the market in question to calculate the home price for months before and after the median home price measured by the 2016 Census. For **median household income** in each CMA, we take the Statistics Canada annual data up to 2021. For subsequent months, we extend the series using average weekly earnings growth as a proxy and apply a Hodrick-Prescott filter to smooth short-term fluctuations.

The second hurdle for the purchase of a home is the monthly mortgage payment. We measure this as the monthly payment on a median-priced home assuming a 25-year amortization period and a 5-year term. The resulting amount is presented as a percentage of income calculated as described above (sometimes referred to as **MPPI**). Note that we do not take the down payment into account in this calculation because there is an opportunity cost in a household's use of these funds for that purpose. Also, we do not wish policy changes in this regard to affect our indicator over time. We also calculate the income needed to purchase the median property assuming that a household devotes 32% of its pre-tax income for a mortgage payment at the posted rate (defined as **qualifying income** and is adjusted for the down-payment). For the condo market, we also compare the monthly mortgage payment to the average rent for a two-bedroom condo in the same market. We calculate that rent from annual CMHC data, updated to the current month by the rent component of the Consumer Price Index. Note that data in the report was seasonally adjusted when necessary.

Toronto

Housing affordability in the Greater Toronto Area (GTA) improved for the ninth consecutive quarter in the first quarter of 2026, with the MPPI* falling by 1.2 percentage points to 70.9%. This marks the longest period of affordability improvement ever recorded in the city, during which the MPPI* has fallen by a total of 20.0 percentage points. Nevertheless, the MPPI* remains above its long-term average of 54.4% and the urban composite average of 52.3%. The pace of quarterly improvement was stronger than that of the composite index for housing other than condominiums (-1.0 pp vs. -0.5 pp) as well as for condominiums (-1.4 pp vs. -0.7 pp). In both cases, the MPPI* remained above the urban composite index. The quarterly improvement in the overall index is attributable to rising incomes and falling home prices (-1.1%), which more than offset the slight increase in mortgage rates. On an annual basis, the MPPI* fell by 8.7 pp, more than double the 4.1 pp decline in the composite 10. *See tables on page 3.

Montreal

In the first quarter of 2026, housing affordability in Montreal deteriorated, with the MPPI* rising by 0.7 percentage points to 44.7%. This marks the sharpest decline in housing affordability in the city since the fourth quarter of 2023. Although the quarterly change ran counter to the improvement observed in the urban composite (-0.5 percentage points), the housing market remained more affordable in Montreal than the urban average, with the latter's MPPI* standing at 52.3%. The quarterly deterioration is the result of an increase in home prices (+2.2%) and a slight rise in interest rates, which together are more significant than the increase in incomes. The condominium segment saw its MPPI* rise by 0.2 percentage points to 34.1%, and that of other housing types rose to 49.0% following a 0.8-point increase. On an annual basis, affordability also deteriorated in Montreal, with the MPPI* rising by 0.5 percentage points, a change opposite to that of the Composite Index 10 (-4.1 percentage points). *See tables on page 3.

Vancouver

Affordability, as measured by the MPPI*, improved by 1.5 percentage points to reach 81.9% in Greater Vancouver in the first quarter of 2026. This marks the longest streak of quarterly declines in the MPPI* on record. Cumulatively, the MPPI* has fallen by 22.0 percentage points from its peak of 103.9% reached in the fourth quarter of 2023. Nevertheless, Vancouver remains the least affordable city in Canada for homebuyers. The quarterly improvement stems from a combination of a 0.8% decline in home prices, rising incomes, and virtually unchanged interest rates. The condominium (-1.1 pp to 47.9%) and other housing (-1.9 pp to 110.0%) segments both saw above-average improvements in their MPPI* during the quarter. Over the past year, the MPPI* in Vancouver has fallen by 10.2 percentage points, the fastest improvement among all the urban centers we cover. *See tables on page 3.

Calgary

Housing affordability in Calgary, as measured by the MPPI*, remained unchanged from the previous quarter. The MPPI* remained stable at 39.3%, a level higher than the average since 2000 (36.3%). Although the quarterly change was less favourable than that of the urban composite (-0.5 pp), the housing market remained more affordable in Calgary than the urban average, with the latter's MPPI* standing at 52.3%. The quarterly stagnation is the result of steady interest rates and a rise in home prices (+1.1%) offset by an increase in incomes. The condominium segment saw its MPPI* rise by 0.1 pp to 22.7%, while the MPPI* for other housing types remained unchanged at 43.3%. On an annual basis, affordability improved in Calgary, with the MPPI* falling by 1.7 percentage points, representing a less pronounced decline than that of the Composite 10 Index (-4.1 percentage points). *See tables on page 3.

Edmonton

Housing affordability in Edmonton remained virtually unchanged over the quarter. The MPPI* rose by only 0.1 percentage points to 33.3%. The MPPI* remains above the city's long-term average (30.2%). This stagnation is the result of nearly constant interest rates and a rise in home prices (+0.6%) combined with an increase in incomes. The effects are the same for homes other than condos as well as for condos, for which the MPPI* also rose by 0.1 percentage points to 34.8% and 19.8%, respectively. On an annual basis, the MPPI* in Edmonton rose by 0.6 percentage points, while it fell by 4.1 percentage points in the Composite 10 Index. *See tables on page 3.

Ottawa/Gatineau

In the first quarter of 2026, housing affordability in Ottawa/Gatineau essentially stagnated, with the MPPI* falling by 0.1 percentage points to 43.3%, a level above its long-term average (33.2%). This result is lower than the 0.5 percentage point improvement observed in the urban composite index, but the MPPI* remains below the urban average (52.3%). The quarterly change stems from a slight increase in home prices (+0.3%) and interest rates, offset by rising incomes. Condominium affordability improved slightly (MPPI* down 0.3 pp to 25.0%), while the MPPI* for housing other than condominiums remained virtually unchanged (-0.1 pp to 47.9%). On an annual basis, the MPPI* fell by 1.2 percentage points, which is less than the 4.1 percentage point decline recorded by the composite index 10. *See tables on page 3.

Quebec City

Housing affordability deteriorated in the first quarter of 2026 in Quebec City, with the MPPI* rising by 0.8 pp to 37.2%. This marks the seventh consecutive deterioration for this market, which stands in stark contrast to the urban composite index, which showed sustained improvements over the same period. The quarterly deterioration resulted from a slight rise in mortgage rates and, more significantly, a 2.4% increase in home prices—too large to be offset by a modest rise in incomes. The deterioration was observed in both the non-condo housing segment and the condominium segment, both of which posted a 0.8 percentage point increase, settling at 37.6% and 26.8%, respectively. Nevertheless, the MPPI* for both segments remained well below that of their respective Composite 10 counterparts (58.4% and 38.4%). On an annual basis, housing affordability in Quebec City deteriorated (MPPI* up 3.4 percentage points), while the MPPI* for the Composite 10 fell by 4.1 percentage points. *See tables on page 3.

Winnipeg

In Winnipeg, housing affordability remained virtually unchanged in the first quarter of 2026, with the MPPI* rising by just 0.1 percentage points to 32.7%. This figure is the lowest among all the urban markets we cover but remains above the city's long-term average (26.2%). The quarterly stagnation is due to stable mortgage rates and a rise in home prices (+0.5%) that is almost entirely offset by an increase in incomes. The MPPI* for the condominium segment deteriorated (+0.6 pp to 22.6%), as did the segment for other housing types, though to a lesser extent (+0.1 pp to 32.8%). On an annual basis, the MPPI* rose by 0.7 pp, while the composite fell by 4.1 pp. *See tables on page 3.

Hamilton

In the first quarter of 2026, housing affordability in Hamilton, as measured by the MPPI*, improved for the ninth consecutive quarter. This improvement (-1.8 percentage points) represents the largest decline in the MPPI* among all urban centers covered for the period. The MPPI* thus fell to 59.0%, which remains above its average since 2000 (42.6%) and the Composite 10 (52.3%). This significant quarterly improvement is the result of stagnant interest rates, rising incomes, and a sharp decline in housing prices (-2.4%). Affordability improved by 2.4 percentage points for the condominium segment and by 1.7 percentage points for the other housing segment. On an annual basis, the MPPI* fell by 6.7 percentage points, compared to -4.1 percentage points for the urban average. *See tables on page 3.

Victoria

In the first quarter of 2026, Victoria recorded a ninth consecutive improvement in housing affordability as measured by the MPPI* (-1.5 pp). This improvement resulted from virtually unchanged interest rates, rising incomes, and a 1.2% decline in housing prices. Consequently, the city's MPPI* stood at 74.5%, a level above its long-term average (59.3%) and the Composite 10 (52.3%). The improvement in affordability is entirely attributable to housing other than condominiums, for which the MPPI* fell by 2.0 pp to 83.7%, the sharpest decline among all the urban markets we cover. Meanwhile, affordability remained virtually unchanged in the condominium segment, with the MPPI* rising by 0.1 percentage points to 42.4%. The MPPI* for all housing types was 4.6 percentage points lower than the level recorded a year ago, a less pronounced decline than the 4.1 percentage point drop observed in the composite index 10. *See tables on page 3.

General: This Report was prepared by National Bank Financial, Inc. (NBF), (a Canadian investment dealer, member of CICO), an indirect wholly owned subsidiary of National Bank of Canada. National Bank of Canada is a public company listed on the Toronto Stock Exchange.

The particulars contained herein were obtained from sources which we believe to be reliable but are not guaranteed by us and may be incomplete and may be subject to change without notice. The information is current as of the date of this document. Neither the author nor NBF assumes any obligation to update the information or advise on further developments relating to the topics or securities discussed. The opinions expressed are based upon the author(s) analysis and interpretation of these particulars and are not to be construed as a solicitation or offer to buy or sell the securities mentioned herein, and nothing in this Report constitutes a representation that any investment strategy or recommendation contained herein is suitable or appropriate to a recipient's individual circumstances. In all cases, investors should conduct their own investigation and analysis of such information before taking or omitting to take any action in relation to securities or markets that are analyzed in this Report. The Report alone is not intended to form the basis for an investment decision, or to replace any due diligence or analytical work required by you in making an investment decision.

This Report is for distribution only under such circumstances as may be permitted by applicable law. This Report is not directed at you if NBF or any affiliate distributing this Report is prohibited or restricted by any legislation or regulation in any jurisdiction from making it available to you. You should satisfy yourself before reading it that NBF is permitted to provide this Report to you under relevant legislation and regulations.

National Bank of Canada Financial Markets is a trade name used by National Bank Financial and National Bank of Canada Financial Inc.

Canadian Residents: NBF or its affiliates may engage in any trading strategies described herein for their own account or on a discretionary basis on behalf of certain clients and as market conditions change, may amend or change investment strategy including full and complete divestment. The trading interests of NBF and its affiliates may also be contrary to any opinions expressed in this Report.

NBF or its affiliates often act as financial advisor, agent or underwriter for certain issuers mentioned herein and may receive remuneration for its services. As well NBF and its affiliates and/or their officers, directors, representatives, associates, may have a position in the securities mentioned herein and may make purchases and/or sales of these securities from time to time in the open market or otherwise. NBF and its affiliates may make a market in securities mentioned in this Report. This Report may not be independent of the proprietary interests of NBF and its affiliates.

This Report is not considered a research product under Canadian law and regulation, and consequently is not governed by Canadian rules applicable to the publication and distribution of research Reports, including relevant restrictions or disclosures required to be included in research Reports.

UK Residents: This Report is a marketing document. This Report has not been prepared in accordance with EU legal requirements designed to promote the independence of investment research and it is not subject to any prohibition on dealing ahead of the dissemination of investment research. In respect of the distribution of this Report to UK residents, NBF has approved the contents (including, where necessary, for the purposes of Section 21(1) of the Financial Services and Markets Act 2000). This Report is for information purposes only and does not constitute a personal recommendation, or investment, legal or tax advice. NBF and/or its parent and/or any companies within or affiliates of the National Bank of Canada group and/or any of their directors, officers and employees may have or may have had interests or long or short positions in, and may at any time make purchases and/or sales as principal or agent, or may act or may have acted as market maker in the relevant investments or related investments discussed in this Report, or may act or have acted as investment and/or commercial banker with respect hereto. The value of investments, and the income derived from them, can go down as well as up and you may not get back the amount invested. Past performance is not a guide to future performance. If an investment is denominated in a foreign currency, rates of exchange may have an adverse effect on the value of the investment. Investments which are illiquid may be difficult to sell or realise; it may also be difficult to obtain reliable information about their value or the extent of the risks to which they are exposed. Certain transactions, including those involving futures, swaps, and other derivatives, give rise to substantial risk and are not suitable for all investors. The investments contained in this Report are not available to retail customers and this Report is not for distribution to retail clients (within the meaning of the rules of the Financial Conduct Authority). Persons who are retail clients should not act or rely upon the information in this Report. This Report does not constitute or form part of any offer for sale or subscription of or solicitation of any offer to buy or subscribe for the securities described herein nor shall it or any part of it form the basis of or be relied on in connection with any contract or commitment whatsoever.

This information is only for distribution to Eligible Counterparties and Professional Clients in the United Kingdom within the meaning of the rules of the Financial Conduct Authority. NBF is authorised and regulated by the Financial Conduct Authority and has its registered office at 70 St. Mary Axe, London, EC3A 8BE.

NBF is not authorised by the Prudential Regulation Authority and the Financial Conduct Authority to accept deposits in the United Kingdom.

EU Residents: With respect to the distribution of this report in the member states of the European Union ("EU") and the European Economic Area ("EEA") by NBC Paris, the contents of this report are for information purposes only and do not constitute investment advice, investment research, financial analysis or other forms of general recommendation relating to transactions in financial instruments within the meaning of Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 ("MiFID 2"). This report is intended only for professional investors and eligible counterparties within the meaning of MiFID 2 and its contents have not been reviewed or approved by any EU/EEA authority. NBC Paris is an investment firm authorised by the French Prudential Control and Resolution Authority ("ACPR") to provide investment services in France and has passported its investment services throughout the EU/EEA under the freedom to provide services and has its registered office at 8 avenue Percier, 75008 Paris, France. "NBC Financial Markets, a subsidiary of National Bank of Canada" is a trade name used by NBC Paris S.A.

NBF is not authorised to provide investment services in the EU/EEA.

U.S. Residents: With respect to the distribution of this report in the United States of America, National Bank of Canada Financial Inc. ("NBCFI") which is regulated by the Financial Industry Regulatory Authority (FINRA) and a member of the Securities Investor Protection Corporation (SIPC), an affiliate of NBF, accepts responsibility for its contents, subject to any terms set out above. To make further inquiry related to this report, or to effect any transaction, United States residents should contact their NBCFI registered representative.

This report is not a research report and is intended for Major U.S. Institutional Investors only. This report is not subject to U.S. independence and disclosure standards applicable to research reports.

HK Residents: With respect to the distribution of this report in Hong Kong by NBC Financial Markets Asia Limited ("NBCFMA") which is licensed by the Securities and Futures Commission ("SFC") to conduct Type 1 (dealing in securities) and Type 3 (leveraged foreign exchange trading) regulated activities, the contents of this report are solely for informational purposes. It has not been approved by, reviewed by or filed with any regulator in Hong Kong. Nothing herein is a recommendation, advice, offer or solicitation to buy or sell a product or service, nor an official confirmation of any transaction. None of the products issuers, NBCFMA or its affiliates or other persons or entities named herein are obliged to notify you of changes to any information and none of the foregoing assume any loss suffered by you in reliance of such information.

The content of this report may contain information about investment products which are not authorized by SFC for offering to the public in Hong Kong and such information will only be available to, those persons who are Professional Investors (as defined in the Securities and Futures Ordinance of Hong Kong ("SFO")). If you are in any doubt as to your status you should consult a financial adviser or contact us. This material is not meant to be marketing materials and is not intended for public distribution. Please note that neither this material nor the product referred to is authorized for sale by SFC. Please refer to product prospectus for full details.

There may be conflicts of interest relating to NBCFMA or its affiliates' businesses. These activities and interests include potential multiple advisory, transactional and financial and other interests in securities and instruments that may be purchased or sold by NBCFMA or its affiliates, or in other investment vehicles which are managed by NBCFMA or its affiliates that may purchase or sell such securities and instruments.

No other entity within the National Bank of Canada group, including National Bank of Canada and National Bank Financial Inc, is licensed or registered with the SFC. Accordingly, such entities and their employees are not permitted and do not intend to: (i) carry on a business in any regulated activity in Hong Kong; (ii) hold themselves out as carrying on a business in any regulated activity in Hong Kong; or (iii) actively market their services to the Hong Kong public.

Copyright: This Report may not be reproduced in whole or in part, or further distributed or published or referred to in any manner whatsoever, nor may the information, opinions or conclusions contained in it be referred to without in each case the prior express written consent of NBF.
